

BODYGEEZ, also known as MELTING, is a band born in 2007 at the instigation of Rémi STEFANSKI, guitarist and composer of the group. STEFANSKI wanted to bring together the musicians he had the best musical experiences with before. This mixing has resulted in a happy alchemy which expresses itself in covers or original compositions tinged with Funk, Jazz and Rhythm'n Blues. During their different projects, the BODYGEEZ shared varied experiences, from covers of Tower of Power to the creation of a musical theatre show ' Fait Divers des MELTINGPOTES '.

Today the music band offers a repertoire of new original compositions, still in a Funk and Rhythm'n Blues register.

## BODYGEEZ it's

- . Yassine BOUDDLAL's high and strong voice
- . An influence skillfully livened up of jazz music with Thomas LEHEMBRE's baritone sax, Eric GOULOIS's tenor sax and Pascal CATTEVILLE's trumpet
- . A groove, filled with adrenaline and tinged with rock music thanks to a rhythmic section made up with Greg VANDENBROUCKE at the drums, Marc WALCZAK at the bass and Remi STEFANSKI at the guitar
- . A hint of Blues and some pinches of Rhythm'n Blues brought by Lucio MORET at the keyboards

BODYGEEZ also proposes some instructive actions in holiday centres for schoolchildren and in schools too : up to four different sorts of work groups to develop writing, singing, dancing and music instrumental practise ; all this as part of a shared project. These work groups are staffed by the musicians of the band, with a special care focused on the dynamic interactions between these different activities in order to result in the shared project : a performance with the band on stage !
